Other Technologies: Node Js, Bulma IO, Bootstrap, MySQL

---

## Pinned Projects

Gamers Connect - <https://github.com/ParagasR/Gamers-Connect>

This is a forum for gamers to post about their favorite games. Allowing users to interact with each other by making posts and commenting, the goal is to bring people together. When a user is created, a profile is automatically generated with a biography and profile, which can be edited by said user. All posts, comments, users, and profiles are saved to the JawsDB database. The application is also deployed on Heroku for a live service.

Used: Javascript, CSS, Bulma, Express, Sessions, Handlebars, Heroku, MySQL, Sequelize, JawsDB, Bcrypt, Cloudinary, Multer

Insomniac's Dashboard - <https://github.com/ParagasR/Insomniacs-Dashboard>

This dashboard is a movie finder for horror fanatics. They can search for a specific movie or be presented with a list of top horror movies. When the user selects a movie, they are presented with a trailer, short description, and rating. All previously viewed movies are also saved under the 'Recently viewed' section.

Used: Javascript, CSS, Bulma, IMDB API, Youtube API

Readme Generator - <https://github.com/ParagasR/Readme-Generator>

This is a readme generator application whereby the user is prompted to enter all the fields applicable to creating a clean readme.

Used: Javascript, Inquirer

## Experience

UHealth - Virtual Health Technician | 2020 - Present | Aurora, CO

Worked in a Virtual Health Center doing different jobs such as cardiac monitoring, patient safety monitoring, clerking the Virtual Urgent Care, and participating in the development in the DHRC program.

Amtote International Service Tech | 2017 - 2019 | Cypress, CA

Worked in various locations ensuring that ticket machines were maintained, product was stocked, and served as a technical consultant on environmental policies to maintain regulatory compliance.

---

## **Education**

Denver University | Denver, CO

Full stack Developer Certificate - 2021
